# Online service Dimona (secured version)

## Before you start

### What is Dimona?

---

Dimona (derived from 'Déclaration Immédiate/Onmiddellijke Aangifte', meaning 'Immediate Declaration') is an online service for employers to notify the NSSO (National Social Security Office) about **every entry** and **leaving** of an **employee**. This 'Immediate Declaration' is mandatory for all employers in the public and private sector.

### Use the secured version of Dimona by preference

---

There are 2 versions of Dimona, a **secured** and a **non-secured** version. As an employer, you should use the **secured version of Dimona** in first instance, as described in this manual. Only if this is not possible, for example due to technical reasons or if you haven't yet received a username and password, you can use the non-secured version as described in the manual for the Online service Dimona (non-secured version).

### Options within Dimona (secured version) described in this manual

---

The secured version of the online service Dimona has several options. This manual focuses on:

- How to **declare (add)** a new employee (also called **Dimona IN**).
- How to **end a working period** for an employee (also called **Dimona OUT**).
- How to **modify** a declaration (also called **Modification**).
- How to **cancel** a declaration (also called '**Annulation**' in French).

Other functionalities of the online services are not described in this manual.
